

CHEMATEST 20

Hand-held Instrument for the Determination
of Disinfectants and pH Value

... CHEMATEST 20

- Photometer with accessories in portable case.
- OXYCON liquid reagents for precise measurements.
- Measurement of mixtures of disinfectants.
- Greatest long-term stability.
- Battery powered with economical electronic circuit.
- Large pushbuttons and clear digital display.
- Automatic storage of measured values.
- Measuring ranges:
 - pH value: 6.5 - 8.0
 - Disinfectants:
 - Chlorine 0.0 - 10.0 mg/l
 - Chlorine dioxide 0.0 - 20.0 mg/l
 - Ozone 0.000 - 2.5 mg/l

Professional Water Quality Control

Photometer for Disinfectants and pH-Value

(Data Sheet No. DenA70065021)

CHEMATEST 20s

Small portable case containing

- Photometer.
- OXYCON reagents for disinfectants and pH value.
- 2 cuvettes.
- Miscellaneous accessories.

(Data Sheet No. DenA70065020)

CHEMATEST 20n

Large portable case containing

- Photometer.
- OXYCON reagents for disinfectants and pH value.
- 4 cuvettes.
- 4 sample containers.
- Miscellaneous accessories.

Options

- Digital thermometer.
- Set of verification cuvettes for quality assurance.

Additional reagents

- OXYCON reagent for the determination of dissolved iron.
- OXYCON reagent for the determination of dissolved aluminum.
